

## Weblog Weak Signals

- <http://www.z-punkt.de/nucleus>
- the weblog aims at collecting information concerning "weak signals", meaning signals of change
- In order to spot changes early = instrument for environmental monitoring, early recognition of possible trends / trend disruptions etc.
- It is meant to be an on-going activity and should become a resource for information (archive + analysis) for The Millennium Project's and Z\_punkt's work
- it can now be used by Z\_punkt, other German Node members and the Millennium Project
- access data and a short manual on how to use the Weak Signals weblog will be distributed to all MP Nodes and other MP Planning Committee members in August 2004
- All of MP-PC members get access, and can (and should!) then put content in
- In reverse, you will get an analysis of the new entries about very two months

### Basic Facts:

- Hosted and realized by Z\_punkt, with additional input by Millennium Project Planning Committee Member
- Networked to other Weblogs of MP
- German and English content, but you can use the English content only as well
- Structured along 5 thematic fields:
  - Society
  - Economy
  - Technology
  - Politics
  - Nature / Environment & Ecology
