

# Achievements of the Venezuela Node 2018-2024

The Venezuela Node of the Millennium Project has made significant contributions in foresight and future studies from 2018 to 2024. Key members have published books, articles, and participated in international events.

by Karelys Abarca

# Latin America 2050 Book Contributions

## Challenge 11

Karelys Abarca authored a chapter on women's empowerment in Latin America by 2050.

## Challenge 13

Karelys Abarca and José Luis Cordeiro wrote about energy model and electromobility challenges.

## Publication

The book has been published in both Spanish and English.

# José Luis Cordeiro's Speaking Engagements

1

## Ibero-Latin American Congress on Longevity

Cordeiro spoke at the event on Margarita Island, Venezuela in February 2024.

2

## Caracas Presentations

Delivered several talks on longevity in the capital city.

3

## Valencia Presentations

Conducted additional presentations on the subject in Valencia.

# Karelys Abarca's Teaching Contributions

## University of Chile

Taught modules on scenario tools and system dynamics in the Strategic Foresight Diploma.

## Colegio de Tamaulipas

Instructed four times in System Dynamics and Scenario Simulation courses for the Master's program.

## National University of Costa Rica

Engaged in two teaching sessions on scenario building for the Master's in Strategic Planning.

# José Luis Cordeiro's Publications

1

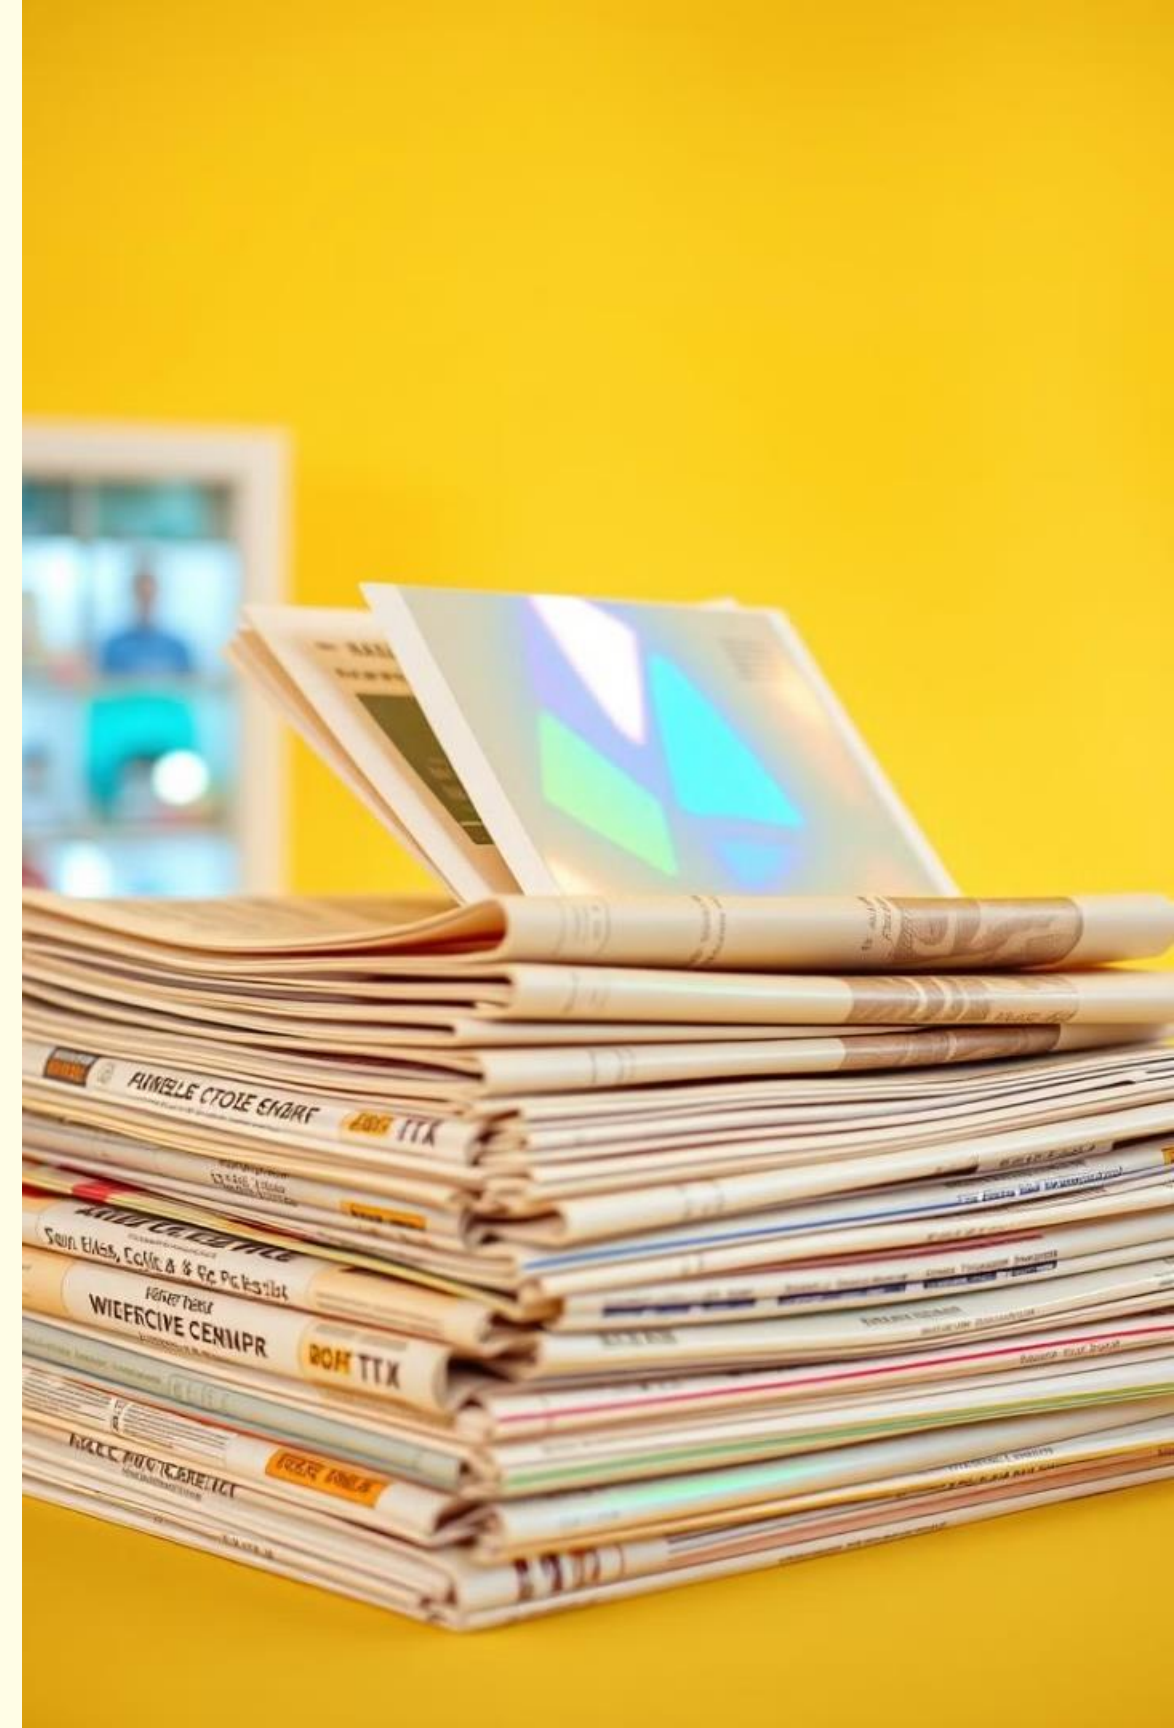

## Newspaper Articles

Wrote approximately 30 articles on foresight and the future for El Universal newspaper.

2

## Book Publication

Presented "The Death of Death" book worldwide, a significant literary contribution.

# Karelys Abarca's Research and Consultancy

1

## Research Stay

Completed a stay at Monterrey Tech, exploring immersive tech tools in strategic foresight classes.

2

## Master's Thesis

Completed thesis on electromobility public policy in Chile and Peru at University of Chile.

3

## Regional Strategies

Participated in consultancies for designing regional strategies in Chile.

# Future Challenges: Publications

## Books

Aim to publish more on future-related topics.

## Longevity

Explore longevity topics in future works.

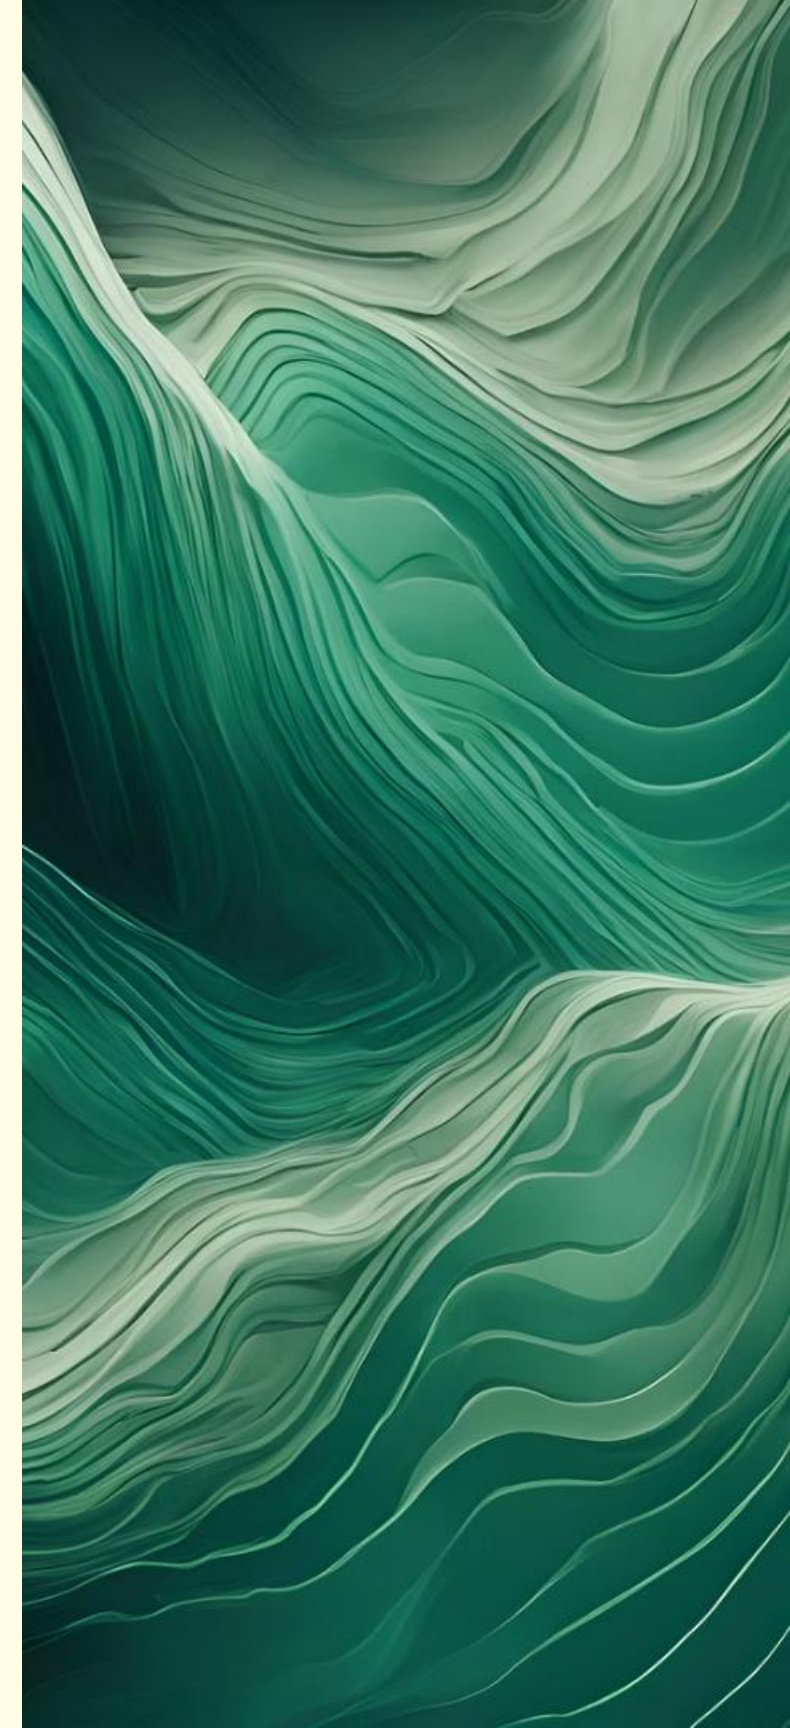

## AI

Focus on artificial intelligence in upcoming publications.

## Models

Develop publications on dynamic models.

# Incorporation of Cedice Juventud

## **New Member**

Plan to incorporate Cedice Juventud into the Venezuela Node.

## **Expansion**

This addition will strengthen the node's capabilities and reach.

## **Youth Focus**

Cedice Juventud brings a fresh perspective on economic knowledge dissemination.

# Greater Linkage with Other Nodes

## Identify Nodes

Locate Millennium Project nodes with significant Venezuelan migrant presence.

1

## Collaborate

Develop joint projects and initiatives leveraging Venezuelan expertise abroad.

3

## Establish Connections

Reach out and form partnerships with these nodes.

2

# Prospective Study on Venezuelan Migration

## Objective

Conduct a study on the economic impact of Venezuelan migration on recipient countries.

## Scope

Analyze various sectors affected by the influx of Venezuelan professionals and workers.

## Outcome

Provide insights for policymakers and businesses in host countries.

# Expanding Research on Artificial Intelligence

1

## AI Applications

Investigate the impact of AI on various sectors in Venezuela and Latin America.

2

## Ethical Considerations

Explore the ethical implications of AI adoption in developing countries.

3

## Policy Recommendations

Develop guidelines for responsible AI implementation in the region.

# Longevity Research Initiatives

## Medical Advancements

Study cutting-edge longevity treatments and their potential impact on Venezuelan society.

## Societal Implications

Analyze the social and economic effects of increased lifespans in Venezuela.

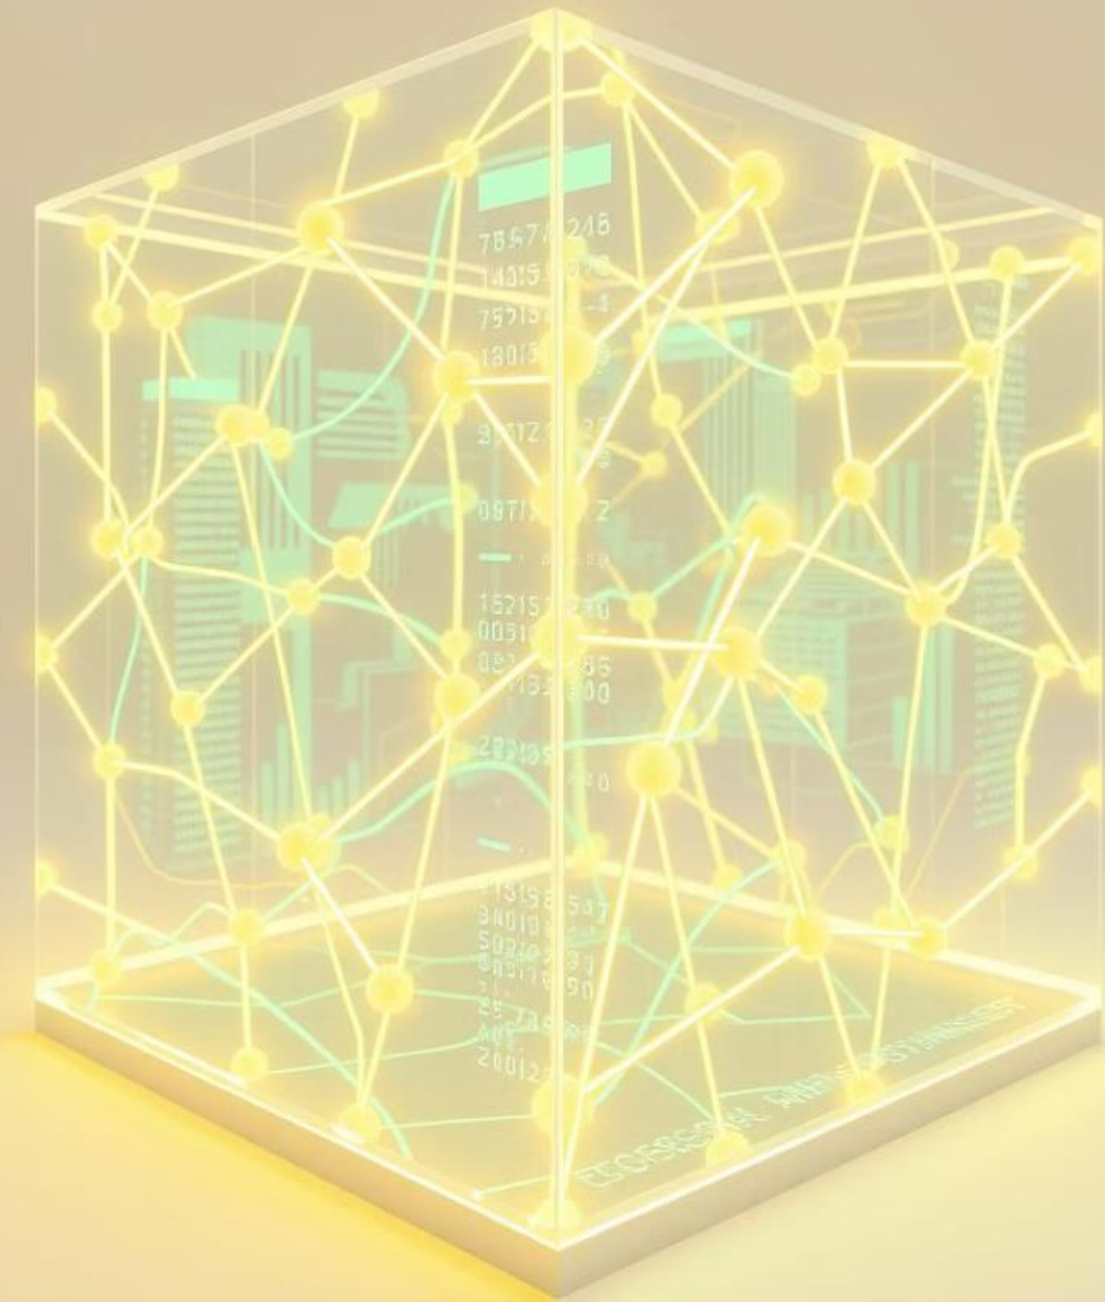

## Quality of Life

Explore technologies and policies to enhance the quality of life for an aging population.

# Developing Dynamic Economic Models

Model Type	Application	Benefit
System Dynamics	Economic Forecasting	Long-term Planning
Agent-Based	Market Simulation	Policy Testing
Neural Networks	Financial Prediction	Risk Management

# Enhancing Foresight Education

1

## Curriculum Development

Create comprehensive foresight courses for Venezuelan universities.

2

## Online Learning

Develop virtual foresight programs accessible to students across Latin America.

3

## Industry Partnerships

Collaborate with businesses to provide real-world foresight projects for students.

4

## International Exchange

Establish exchange programs with global foresight institutions.

# Promoting Sustainable Development

## Green Energy

Research renewable energy solutions for Venezuela's future.

## Circular Economy

Develop models for sustainable resource management.

## Smart Cities

Plan for technologically advanced, sustainable urban environments.

LA NACION &gt; Opinión - Opinión

## Javier Milei: por qué arrasa, ¿genio o loco?

30 de agosto de 2023 • 17:25

**Laura Di Marco**

PARA LA NACION

Milei está obsesionado con la muerte. Es un temor que lo persigue desde siempre. Tal vez por eso explora la posibilidad de la inmortalidad física. Uno de sus libros de cabecera, apoyado sobre la mesa del living de su chalet de dos plantas, es *La muerte de la muerte*, de José Luis Cordeiro y David Wood. En su portada, los autores se preguntan: ¿será la muerte, en apenas unas décadas, algo opcional?
