The Millennium Project

LABORATÓRIO DO FUTURO

Director: Prof. PhD. Jano Moreira de Souza

Main projects

Methodologies and Systems for Technology Forecasting

TIAMAT is modular and supports several prospecting methodologies. NERMAP is specifically aimed at building roadmapping from text recognition.

More info: <http://nermap.cos.ufrj.br/>

Employability Journey

Support decision-making at different stages, from choosing a course to picking a career at the end of the course, through defining the portfolio of courses offered by Higher Education Institutions.

More info: <http://laboreies.cos.ufrj.br/>

Citizen Participation

SoPA is an application that promotes a collaborative environment to enable citizens to contribute to solving society's problems and provides feedback to public management.

More info: <https://www.sociedadeparticipativa.com/>

IoT and IoE for Smart Cities

Theories and technologies aimed at empowering citizens as a sensor in situations such as monitoring waiting times in public services. Creation of sensor networks for sustainable cities.
